MESSAGE FROM OUR DIRECTOR

DOÇ. DR. ALİ KÜRŞAT ERÜMİT

Dear Readers

Distance education, which dates back to the teaching of stenography by letter in the 1700s, has increased its prevalence with the change in the tools and teaching environments used with the development of technology throughout history. Today, distance education, which has turned into e-learning with the publication of digital opportunities, has become the sole way of education and training activities in our country as of March 2020, as in the whole world with the Covid-19 pandemic. In this process, the distance education method, which has been applied at all levels of education for about 2 years, has increased the level of technology usage and experience of almost all educators and students. The pandemic process, in which many different technologies and teaching tools have been tried and spread, has made the importance of distance education and the importance of distance education application and research centers that provide the necessary infrastructure and expertise support to carry out these activities at the university level more understandable.

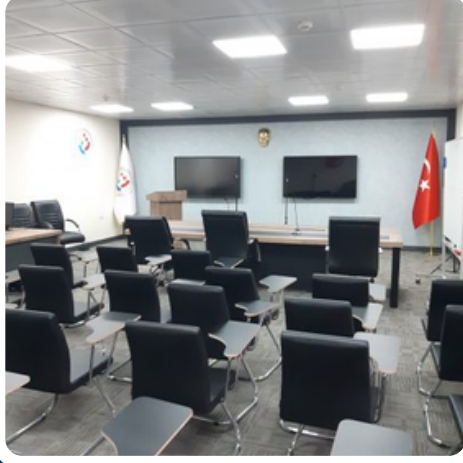

In a period when digitalization continues at a great pace, our center, which works intertwined with technology, serves all units of our university. For this reason, it hosts an important part of the digital data of our university. It is very important to provide the necessary infrastructure in the processes of creating, storing and processing this data. In this context, our own server infrastructure has been established and put into service as of 2021. We would like to thank our Rector Prof. Dr. Emin AŞIKKUTLU and our rectorate administration for this.

However, another factor that is at least as important as infrastructure is expert staff. In this regard, I owe a debt of gratitude to all our staff who have been involved in UZEM activities since our establishment and especially during the pandemic process and who have worked faithfully regardless of working hours.

In 2018, we are happy to publish this first issue of our bulletin in order to provide information about the activities carried out by our center, which continues its services without interruption as one of the first established units of our university, and to introduce its fields of activity. In addition, our bulletins will include training series on distance education and related technologies.

ABOUT US

Founded in 2018, Trabzon University Distance Education Application and Research Center fulfills an important responsibility within the scope of lifelong learning with the distance education programs and certificate programs it has implemented since its inception. Considering that distance education has become a necessity rather than an option in today's world economy, which is shaped in line with information technologies, in the coming years, our Center will continue to work towards achieving the goals it has set on the one hand, and on the other hand, to increase the quality of human resources in order to maximize the quality of service it offers and to improve the capacity and organizational capability of the institution.

MANAGEMENT

Established in 2018, Trabzon University Distance Education Application and Research Center, within the framework of human-oriented education, research and application activities with its academic and administrative staff, conducts studies at international standards based on information communication technologies in order to train qualified individuals who are needed today and in the future. In this context, the vision of the center is to have a say at the international level in terms of program quality and student opportunities in educational applications offered by distance education method.

OUR TEAM

**Öğr. Gör. Gülbahar Merve ŞILBİR**

Gülbahar Merve ŞILBİR, whose area of expertise is "Computer and Instructional Technologies" and who has been working in our center for more than 2 years, works in Web Site Management, Educational Services, Content Design, Live Lecture System Management, Statistics, Reporting, R&D, Project Development and Technical Support.

Öğr. Gör. Dr. Merve AYDIN

Merve AYDIN, whose area of expertise is "Instructional Technologies" and has been working in our center for more than 2 years, works in the Non-Thesis Master's Programs, Continuation of Postgraduate Education, Common Courses and Technical Support Department.

**Öğr. Gör. Ayşe Banu PAK**

Ayşe Banu PAK, whose field of expertise is "Statistics and Computer Science" and has been working in our center for more than 1 year, is responsible for Defense Exams, Webinar Events, Web Page and Social Media account management and Technical support.

Öğr. Gör. Hasan Yiğit CEBECİ

Hasan Yiğit CEBECİ, whose field of expertise is "Computer and Instructional Technologies" and has been working in our center for more than 1 year, works in Software development, System management and Technical support department.

**Şef Sait SEVİM**

Trabzon University Distance Education Application and Research Center Directorate is the administrative officer responsible for making and following up correspondence with the Rectorate, other units of Trabzon University, public and private institutions.

ACTIVITIES

ONLINE TRAINING SEMINARS

STUDENT, ACADEMICIAN TRAINING SEMINARS WERE HELD FOR THE 2021-2022 ACADEMIC YEAR DISTANCE EDUCATION PROCESS

In our university, online trainings were held to introduce the Hybrid Education Model and distance education system, where face-to-face and online education will be carried out together in the 2021-2022 Fall Semester. Center Director Assoc. Prof. Dr. Ali Kürşat ERÜMIT and Lect. Assist. Merve Gülbahar ŞILBİR, the Microsoft Teams platform and eders platforms used in the management of courses were introduced to academicians and students.

“

LET'S SAY "WELCOME" TO OUR NEW STUDENTS AND ACADEMICS! I AM SURE WE WILL HAVE A GREAT YEAR!

-

ALİ KURŞAT ERÜMIT

ACTIVITIES

ITTES 2021

ITTES 2021 TAMAMLANDI

The 8th International Symposium on Instructional Technologies and Teacher Education (ITTES 2021) was held in Trabzon (Online) between November 17-19, 2021, hosted by Trabzon University and Karadeniz Technical University in cooperation with Trabzon Provincial Directorate of National Education. Within the scope of the symposium; workshops, panels, oral presentations, and poster presentations were held.

The studies carried out at the symposium will be published as "ITTES-2021 Abstracts E-Book", "ITTES-2021 Proceedings Full Text E-Book" and will be published in the book titled "Education and Change".

ACTIVITIES

2020-2021 ACADEMIC YEAR ONLINE GRADUATION CEREMONY

The graduation ceremony was held by Trabzon University Rectorate with the participation of the Rector of our university, Prof. Dr. Emin AŞIKKUTLU. In order to prevent the Covit 19 pandemic process from affecting the graduates of our 2020-2021 university, the pandemic conditions of the graduation ceremony were overcome by the distance education center and the graduation ceremonies of all academic units were held on the online platform. The online graduation ceremony held between July 7-9, 2021 using the Microsoft Teams platform was broadcast live for families and guests.

DATE

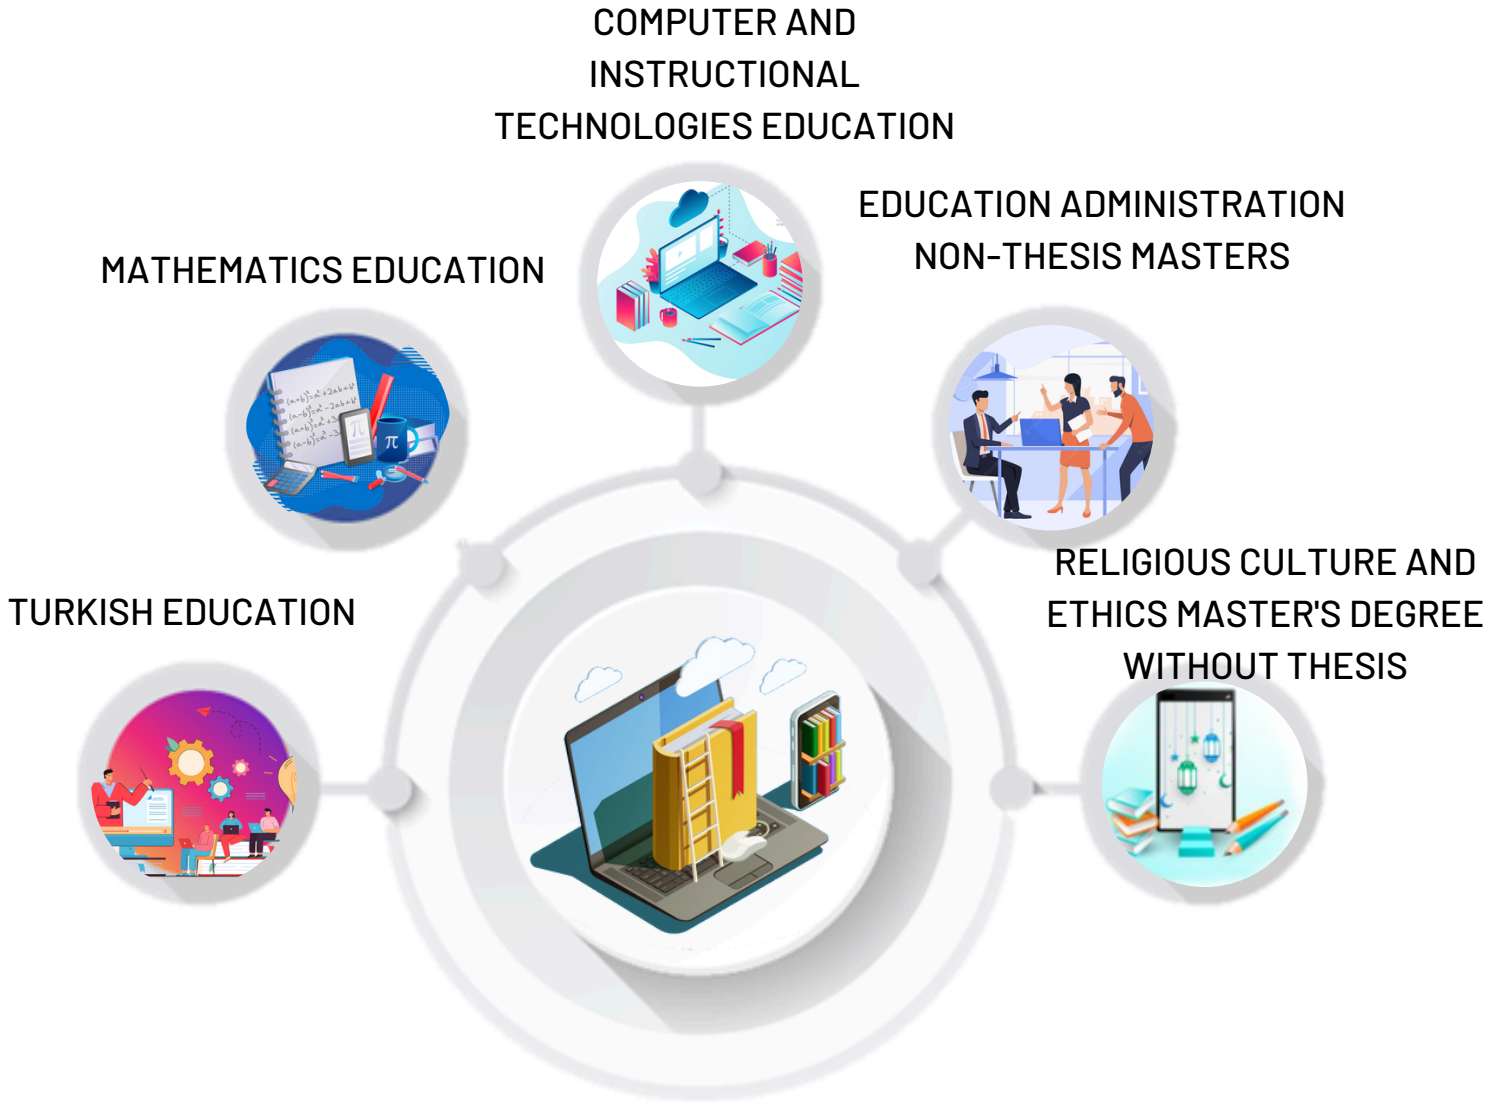

January 25-February 3, 2022

Fast and Comprehension Course was held for the 4th time in our center

"Fast and Meaningful Reading Course" organized by Trabzon University Distance Education Application and Research Center has been completed. Our valuable students who participated in the course were entitled to receive a "Fast and Meaningful Reading" certificate. Our valuable students have successfully completed the course.

ACADEMIC ACTIVITIES

In the Spring semester of 2021-2022 academic year, we are serving 5 new non-thesis master's programs.

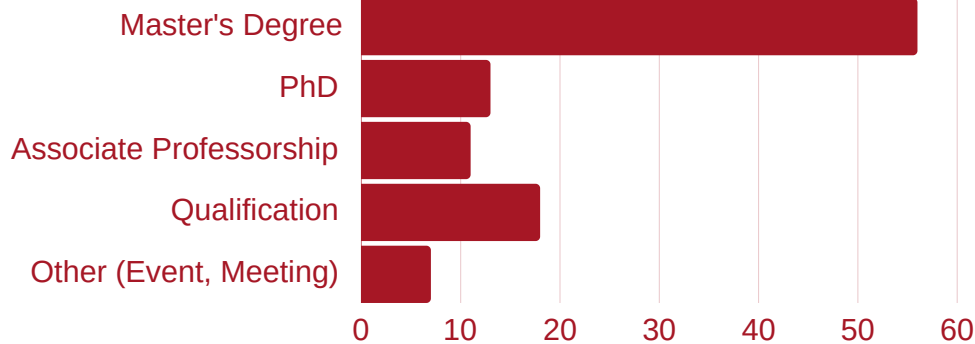

Click here for detailed information about the application process of our Distance Education Non-Thesis Master's Programs.

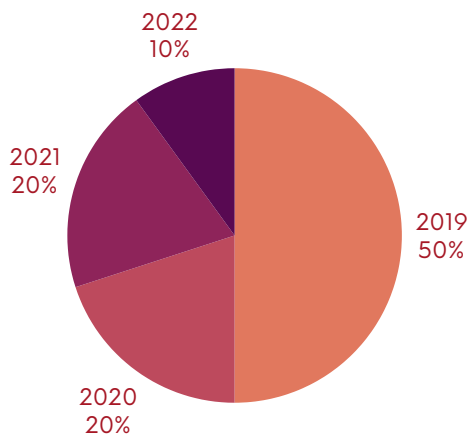

(2019-2022) STATISTICS

ACTIVITY STATISTICS

DEFENSE EXAMS

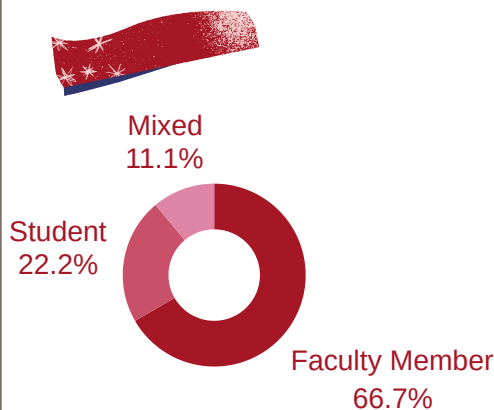

COURSES-CERTIFICATES

COURSE CONTENT

Courses that serve many target groups and many fields, especially fast and meaningful reading, visual design, interpersonal communication, tourism counselor training, intelligence and mind games trainings, have been organized. Coordinated by Assoc. Prof. Dr. Ali KÜRŞAT ERÜMİT, Assoc. Assoc. G. Merve ÇAKMAK ŞILBİR and Assist. Assist. Ayşe Banu PAK, there are 13 different types of courses in this activity.

IN-SERVICE TRAININGS

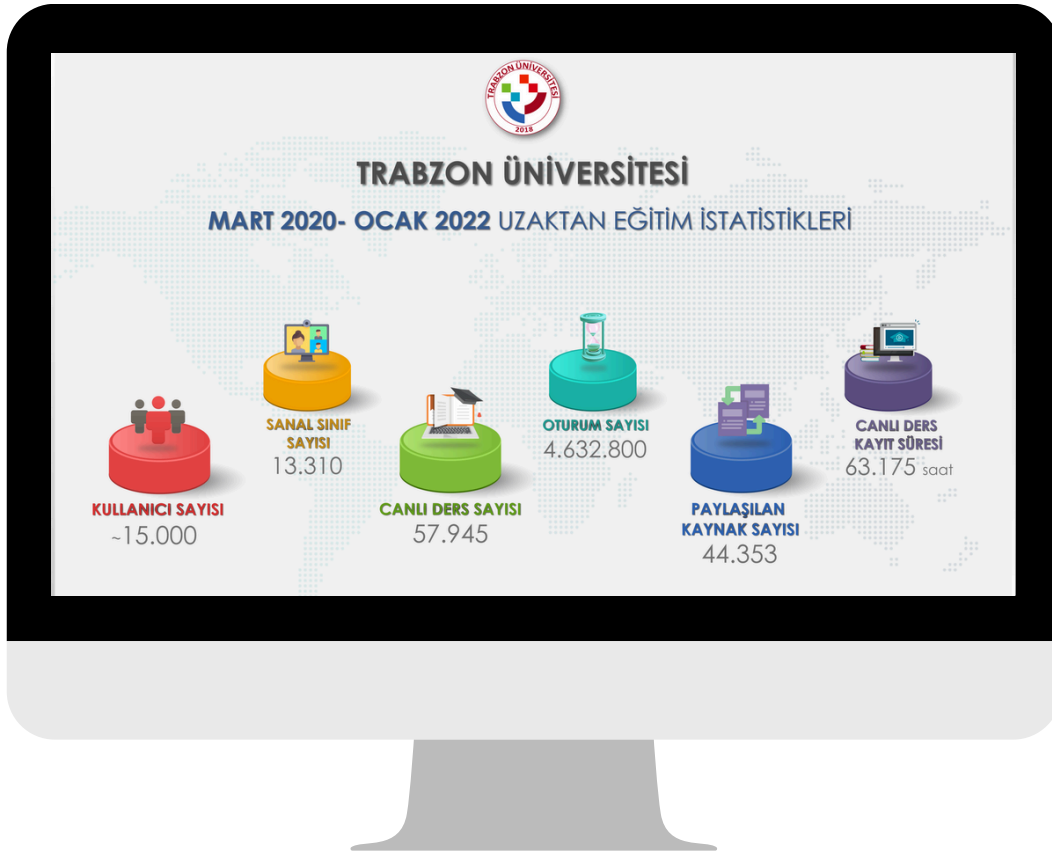

EDUCATIONAL CONTENT

Our center has organized online training for the use of asynchronous and synchronous distance education systems (E-Course, E-Exam, Adobe Connect, MSTeams). These trainings, with the number of participants varying between 7000 and 1000, were later made available on the UZEM Youtube channel and delivered to the entire target audience. Instructors Assoc. Dr. Ali KÜRŞAT ERÜMİT, Assoc. Dr. Ayça ÇEBİ, Dr. Lecturer Member, Muharrem AYDIN, Lecturer. See. G. Merve ŞILBİR, Dr. Lecturer Member Lokman ŞILBİR, Res. See. Murat ATASOY, Lecturer. See. Adil YILDIZ carried out practical studies on the effective use of distance education systems in the education process, and successful trainings were carried out by answering the questions of the participants at the end of the training.

TRABZON UZEM

COVID-19 (2019-2022) STATISTICS

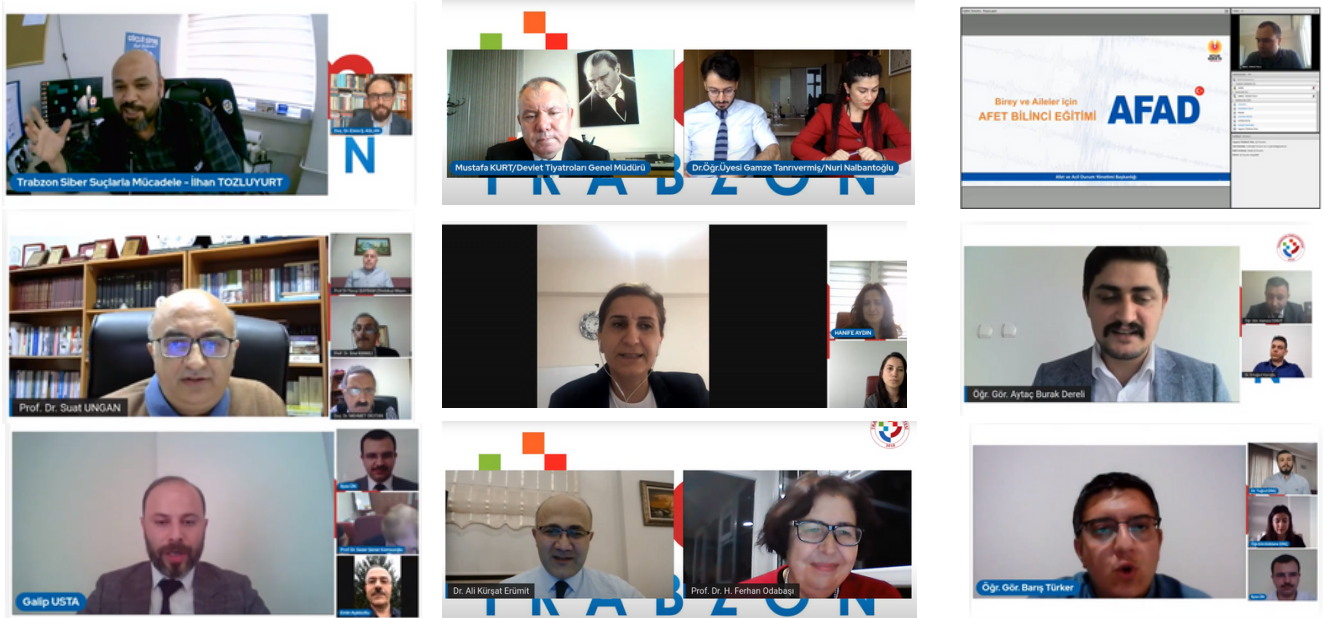

Trabzon University Distance Education Application and Research Center has not left any of our internal stakeholders alone with its team, both pedagogically and technologically, since the year it was established and has provided many supports on numerous issues.

COVID-19 (2019-2022) Hotline Statistics

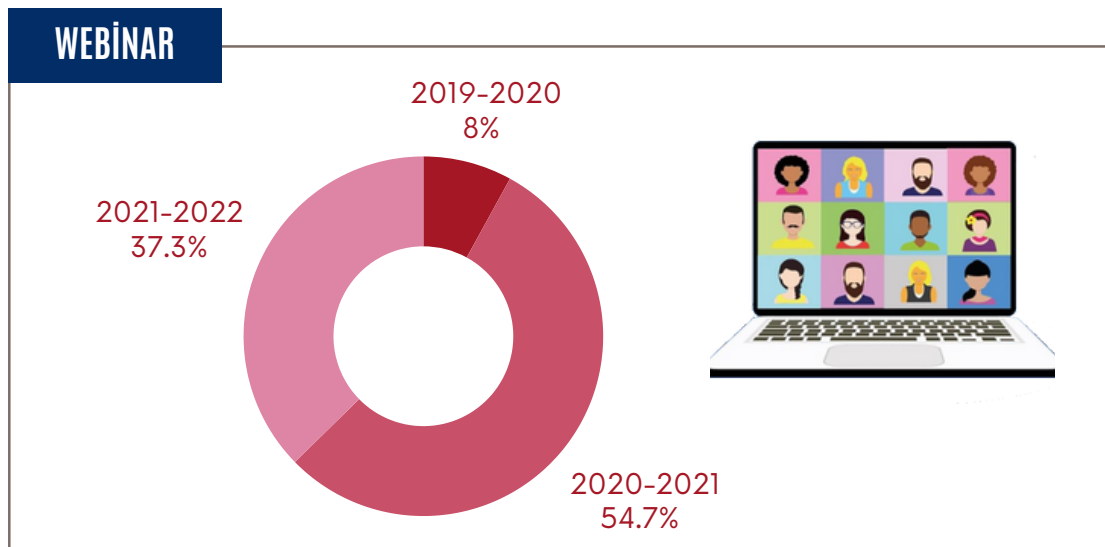

TRABZON UZEM COVID-19 WEBINARS

As Trabzon University Distance Education Application and Research Center, online webinars have been held on various topics for both our students and our academic and administrative staff for 3 years, 2019-2020, 2020-2021, 2021-2022. During the Covid-19 period, online seminars on topics such as "COVID 19 as a Crisis Experience: The Effects of the Pandemic on the Maturation of the Human Spirit" and "Raising Happy and Successful Children" stand out.

WE ARE IN THE PRESS

Trabzon University UZEM Director Erümit spoke to Kuzey Ekspres.

"With the pandemic process, universities switched to distance education. In this process, the distance education centers of universities took the heaviest burden. In this process, the centers that ensure online education and all content to reach students properly have become the most important point of education. Trabzon University was one of the UZEM centers that managed this process the best. Faculty member Ali Kürşat Erümit, the director of the center, which carries out its work in the fastest and most error-free way, said, "When the Covid-19 pandemic started, we completed all our preparations in a short period of 5 days after the interruption of education at universities and resumed education and training activities with distance education."

“

"When the Covid-19 pandemic started, after the interruption of education at universities, we completed all our preparations in a short period of 5 days and resumed education and training activities with distance education"

ACADEMIC INTERVIEW

METaverse

Written by Öğr. Gör. Dr. Merve AYDIN

Different technologies such as augmented reality and virtual reality, which have recently emerged from innovative technologies and are used in many fields, have attracted people's attention.

In particular, the importance of these technologies has gradually increased as they offer opportunities such as trying the modeled design through technologies without using the real model, being an effective advertising tool for companies in product promotion, providing interactive meetings, interviews and most importantly, being used as instructional tools in important fields such as medicine, biology, chemistry in education. With high-end wearable technologies, interactions on these technologies are increasing and increasing interactions and advancing technologies are preparing to be replaced by "Metaverse" technology.

Well, we have heard of augmented reality, we have heard of virtual reality, but what is this metaverse?

The metaverse, which was first used as a word in Neal Stephenson's novel Snow Crash in 1992, means "beyond the universe", which is the equivalent of the words meta and verse.

It can be defined as a 'digital world' where the real and virtual worlds merge with science fiction.

It can be called a new virtual realm where everyone has their own digital identity and creates an avatar representing themselves, where they can do all the actions they do in the world. When the existing technologies are examined, it seems that technologies such as augmented reality, virtual reality and mixed reality are not enough for the metaverse for now, but many applications have started to come to the agenda as games. In short, in environments similar to the virtual world environment such as Secondlife, Opensim, etc., you buy yourself a plot of land (parcel) and fill it with objects that you can design or buy yourself. It is inevitable that this technology will have an important place in our lives in the future, considering that an important market network is thought to be established and that certain plots are already being purchased rapidly on many game platforms (Sandbox, Axie infinity, Decentraland, to give examples of game platforms called the current metaverse). So much so that people will not want to get up from this virtual world and move to the realm of the realm is among the most talked about issues. Although it sounds a bit scary, the current situation shows it.

“

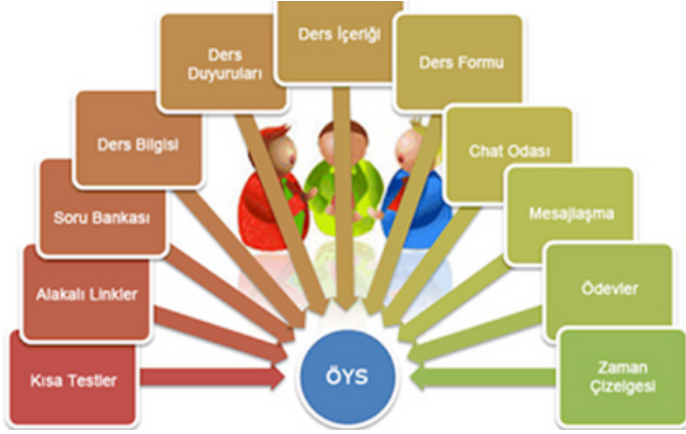

As the concept of Metaverse is on the agenda to be used in education, you can achieve great success by having knowledge about this technology.

ACADEMIC INTERVIEW

LEARNING MANAGEMENT SYSTEM

Written by Öğr. Gör. Hasan Yiğit CEBECİ

WHAT IS LMS?

With the need for distance education systems during the pandemic period, e-learning and, accordingly, learning management systems have become important. According to Kaya, E-learning; It is the use of technology effectively to create a learning environment that can be accessed from anywhere. E-learning is a web-based education system offered over the internet. Learning Management System is software that is in the sub-dimension of e-learning and enables web-based distance education activities. Today, there are Learning Management Systems (LMS) with many different features used for this purpose. The main purpose of LMSs is; To facilitate and organize teaching activities.

TYPES OF LMS

LMS consists of modules, these modules; It is a course, content, registration, reporting and measurement and evaluation module. The most used LMSs today are Moodle, Google Classroom and aTutor. LMS software has many features such as presenting, sharing, editing course materials, giving assignments, taking exams and reporting. There are paid or open source free software. In the e-learning process, after determining the training needs, the LMS that suits the needs can be selected.

LMS FEATURES

When we look at it from the user's perspective, learning management systems must have features such as portability, interoperability, reusability, manageability, accessibility, continuity and scalability. In addition to these features, learning management systems; It provides management of educational contents (learning material presentation, sharing, editing), documentation and reporting, individualization of learning and teaching processes, student-instructor, student-student communication, measurement and evaluation, taking homework and related feedback opportunities.

ACADEMIC INTERVIEW

WEBINAR

ÖĞR. GÖR. AYŞE BANU PAK

Webinar, also called web-based seminar, web conference and virtual classroom, is one of the working and interaction methods that enable people and institutions to communicate with each other with the diversification of technology and communication networks. It allows people in different locations to communicate via the internet. Face-to-face teaching has no such limitations compared to locational limitations. Zoom uses many other software, including GoToWebinar, BigMarker, Adobe Connect, WebEx, ClickMeeting, Clirnet, Medflix and more.

Webinar systems, which have increased in popularity during the Covid-19 epidemic, appear as an instructional technology that can be used for various purposes, especially distance education, and whose use is becoming increasingly widespread. Its most important feature is that it allows simultaneous interactive meetings, seminars, presentations, lectures, workshops and workshops to be held live on the internet, regardless of the location. Moreover, its most obvious advantage is the high degree of flexibility it provides to participants. Webinars are not aimed at specific people, but can also be held with high participation.

It is one of the software that makes distance education much more effective during the pandemic period. One of the factors in its rapid spread in this period is that the hardware and software required for its use are easily obtainable. Additionally, the Webinar is based on two-way communication. Webinars, which usually take place on a predetermined day and time, also allow participants to ask questions and comments. They allow for global participation by enabling communication between individuals around the world. Meetings with people in remote locations, distance education, information sharing in the field of health and medicine, etc. Webinars are available.

“

"The webinars held within our organization are carried out through the Streamyard browser. They are defined as live broadcast platforms. The most distinctive features that distinguish Streamyard from other webinar platforms are its simplicity, as well as the opportunity to quickly broadcast live by taking a guest."

TRAINING SERIES-MS TEAMS 1

MICROSOFT TEAMS EVERYWHERE

Written by Öğr. Gör. Gülbahar Merve ŞILBİR

With the pandemic period, it has been observed that interest in distance education systems has increased worldwide. Many platforms that offer online education environments have been used at almost all education levels, ensuring the continuity of education during periods of social isolation. In this process, Microsoft Teams, which appeals to the organization of business life in general, as well as widely used platforms such as Zoom, Google Meet, BigBlueButton, Adobe Connect, has been appreciated by all audiences for playing a role as the savior of education in an extraordinary situation such as the Pandemic. Teams, which has over 270 million active users today, has been an incredible success for Microsoft. The number of daily meetings, which was 560 million at the beginning of the epidemic, increased almost 5 times, reaching 2.7 billion in just 1 month. For this situation, Microsoft CEO Satya Nadella said, "We experienced the digital transformation that could have occurred in 2 years in 2 months." He used the expressions.

Let's Take a Close Look at Microsoft Teams

Teams is a platform developed by Microsoft that offers remote voice, video and text calls, where users can share screens or files with each other and work on a common project by forming a team. At the same time, it offers easy access from all devices thanks to its ability to integrate with Microsoft 365 modules and cloud storage. With these features, Teams aims to offer a platform where people can collaborate and be productive in any environment.

Highlights in Education

TOGETHER MODE
(BİRLİKTE MODU)

DYNAMIC VIEW
(DİNAMİK GÖRÜNÜM)

VIDEO FILTERS
(VİDEO FİLTRELERİ)

LIVE REACTIONS
(CANLI TEPKİLER)

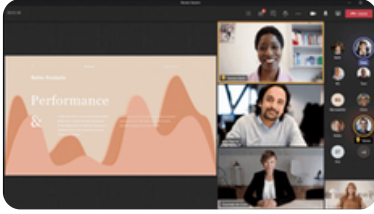

LIVE CAPTIONS
(CANLI ALTYAZI)

TRAINING SERIES-MS TEAMS 1

1.TOGETHER MODE (BİRLİKTE MODU)

It's a feature in Teams that uses AI segmentation technology to digitally place participants in a shared background, allowing all participants to feel like they're sitting in the same room.

2.DYNAMIC VIEW (DİNAMİK GÖRÜNÜM)

You can personalize the view with the dynamic view feature, which allows you to show shared content and specific participants side by side.

3.VIDEO FILTERS (VİDEO FİLTRELERİ)

With this feature, various filters are offered with which light levels can be adjusted and the camera view can be customized before joining a meeting.

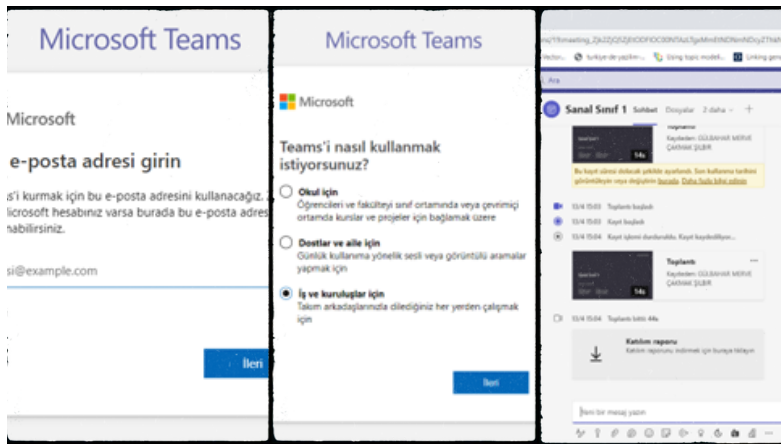

4.LIVE REACTIONS (CANLI TEPKİLER)

In meetings and online presentations, all participants can follow your feelings about the subject with an emoji that allows the audience to show their reactions without interrupting the flow of the meeting. Live reactions are a feature shared with PowerPoint Live Presentations that allows audience members to provide instant feedback to the presenter.

5. LIVE CAPTIONS (CANLI ALTYAZI)

The live subtitle feature can be turned on to follow conversations in different languages in meetings. It is expected that speaker and subtitle association will be made with new updates and will be developed with different language options other than English.

Accessing Microsoft Teams

To sign up for Microsoft Teams, you must first log in to the access link (<https://www.microsoft.com/tr-tr/microsoft-teams/log-in>) with any internet browser and type your existing Microsoft account with the "Sign Up for Free" link. You can complete the registration process.

While you can use Teams via the browser or desktop application, you can also use the application by downloading the Microsoft Teams application from the Play Store or App Store for smartphones or tablets.

“

Let's complete the first part of our Microsoft Teams training series here. We will cover the details of using Teams in our next training. You'll be amazed at what you can do with Microsoft Teams.

CONGRATULATIONS TO OUR ACADEMICS

DOÇ.DR. AYÇA ÇEBİ

Assoc. Prof., who has worked at our university for many years and has undertaken many duties since the establishment of our center and has made significant contributions to our center. Dr. Ayça ÇEBİ received the title of "Associate Professor" and was appointed as a faculty member in the Department of Computer and Instructional Technologies Education. We congratulate our academician and wish her success in her future life.

DR. ÖĞR. ÜYESİ
MUHARREM AYDIN

Res. Res., who has worked at our university for many years and has undertaken many duties since the establishment of our center and has made significant contributions to our center. See. Muharrem AYDIN received the title of "Doctor" and was appointed as a faculty member at Çarşıbaşı Vocational School Computer Technologies Department. We congratulate our academician and wish him success in his future life..
